Use Case 2	Manage Project
Scope:	System-wide
Primary Actor:	Project Leader
Administrator, Project Leader:	- Administrator: Assign project leader. - Project Leader: Assign activities to project and manage them.
Description:	Makes it possible to assign a project leader, change project leader and assign and manage activities to project

Main Success Scenario:
1. Admin assigns project leader.

2. Project leader assigns activities to project.

3. Project now managed.

Alternative Scenarioes:
1.a Admin assigns wrong project leader:

    1. Admin changes project leader.

    2. Project Leader continues on step 2.

1.b Admin assigns invalid project leader:

    1. System shows failure message

    2. Admin assigns correct project leader

2.a Wrong activity data:

    1 Project leader corrects activity data

    2 Project leader continues with step 3

2.b Invalid activity data:

    1 System shows failure message

    2 Project leader returns to step 2 and corrects the errors
