Use Case 1	Create Project
Scope:	System-wide
Primary Actor:	Administrator
Stakeholders and Interests:	• Administrator: Needs to be able to create and modify projects • Project Leader: Needs to modify projects and add activities to projects • Developer: Needs to be able to see projects
Description:	Makes it possible to create a project

Main Scenario:
1. Gives the administrator the possibility to create projects

2. The administrator will be able to create with a given name and project leader.

Alternative Scenarios:

1.a Invalid login data:

1. System shows failure message
2. System returns to step 1

2.a No project leader assigned:

1. If project leader is not assigned, it will create the project with no project leader.
2. Administrator will be able to set the project leader by modifying the project

2.b No project name assigned:

1. If project name is not assigned, a default name will be assigned
2. Administrator or project leader will be able to change the name, by modifying the project.
